JAEMO Editorial Line

The *Journal of Applied Economics and Management of Organizations (JAEMO)* publishes scientific articles in the fields of economics and management sciences, as well as in related disciplines. Today, these sciences have evolved and intersect with other disciplines, which enriches their scope of study and their impact.

JAEMO aims to promote rigorous, original and innovative scientific research. The journal accepts contributions in French and English and appears biannually (June and December). Articles must address a clear problem, propose a structuring conceptual framework, a solid methodology, quality data with rigorous analysis, and lead to results that can contribute to applied research and policies.

Theoretical papers are also accepted provided that they present modeled stylized facts and clear intuitions about advanced theories. These manuscripts should demonstrate a thorough conceptualization and rely on rigorous methodological tools to allow for future empirical verifications. The journal imposes a strict requirement for scientific rigor.

Publication and format

The journal is available in electronic and paper versions under the ISSN **1987-1694** , with a biannual publication. The online version is accessible in PDF format, either in full volume or in offprints. The printed version is in A4 format.
